SOURCE: IBO, based on Internal Revenue Service, County-to-County Migration Flow Data.

NOTE: The number of entrant tax filers equals the number of new tax returns filed by New York City residents in the second reference year listed, and the number of exits is the number who left between the first and second reference years. For example, in the 1988-89 row, 61,408 is the number of new filers in 1989, and 106,033 is the number of filers who left between 1988 and 1989. See text for discussion of sources and additional measurement.

SOURCE: IBO, using the County-to-County Migration Flow Data prepared by the Internal Revenue Service.

NOTE: County-to-county migrations of fewer than 10 tax filers are not identified separately. For New York State, we have the total number of unidentified moves into New York City. But for other states, moves of fewer than 10 returns from and to counties cannot be identified. Thus, some state totals may be underestimated and some states do not appear at all.
