**WHAT IS CITIZEN ICAM?** The Chicago Police Department developed Citizen ICAM to provide residents of the City of Chicago with a tool to assist them in problem-solving and combating crime and disorder in their neighborhoods. It is based upon the ICAM (Information Collection for Automated Mapping) system developed by the Department for use by its police officers.

Now, Citizen ICAM enables you to search the Chicago Police Department's database of reported crime. You will be able to see maps, graphs, and tables of reported crime. The database contains 90 days of information which you can access in blocks of up to 14 days. Data is refreshed daily. However, the most recent information is back-dated 7 days from today's date.

**For example:** If today is June 7th, the database will contain information for the months of March, April, and May. The most recent information available would be from May 31st. You would be able to search up to 14 days in a row -- April 1st through April 14th.

**TO BEGIN:** In the column to the right, click on the method by which you wish to conduct your search -- [search by address](#), [search by police beat](#), [search by intersecting streets](#), or [search by school](#).

**PLEASE NOTE:** For optimum performance Citizen

**SCHOOL**  
 search by school

**Appendix 2.** The Chicago Police Department "Citizen ICAM," published on the city's office Web site, allows the public to query the department's database of reported crime. The reporting format is neighborhood based, allowing users to search by address or school name, for example, to see crime statistics for a local area.

**DISCLAIMER:**  
 This data reflects crimes as reported to the police as of the current date, occurring during the selected date range for the selected area. These crimes are based upon preliminary information supplied to the Police Department by the reporting parties and have not been verified. The preliminary crime classifications may be changed at a later date based upon additional investigation and there is always the possibility of mechanical or human error. Therefore, the Chicago Police Department does not guarantee (either expressed or implied) the accuracy, completeness, timeliness, or correct sequencing of the information and the information should not be used for comparison purposes over time. The Chicago Police Department will not be responsible for any error or omission, or for the use of, or the results obtained from the use of this information. All data visualizations on maps should be considered approximate and attempts to derive specific addresses are strictly prohibited.
